Please choose, which value you \*  
like to predefine.

evacuation period  
motive flow

## Data of the motive flow

**tr**

motive medium

motive pressure

$p_{tr}$

motive flow

$\dot{m}_{tr}$

kg/h

motive flow temperature

$t_{tr}$

°C

## Data of the suction flow

**s**

suction medium

volume to be evacuated  
(including pipeline)

$V$

$m^3$

evacuation period

$t$

min

suction pressure

$p_s$

start

end

suction flow temperature

$t_s$

°C

molecular weight

$M_s$

kg/kmol

air leakage flow

$\dot{m}_L$

kg/h

## Data of mixed flow

**d**

discharge pressure

$p_d$

(For another motive medium, please  
use the corresponding questionnaire.)

## Constructive requirements

material \*

→

connections, type, pressure range \*

→

design code

→

documentation

drawing

manual

acc. press. equipment directive

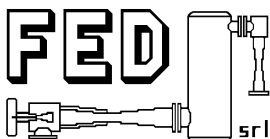

material certificates

other →

\* mandatory field

By pushing **send** the questionnaire will send to company FED via e-mail.

You will receive an answer as soon as possible
